

Cordele Judicial Circuit

Sexual Assault Response Team Protocol 2025-2026

The **SEXUAL ASSAULT RESPONSE TEAM (SART)** is a collaborative response to victims of sexual assault by law Enforcement Officials, The Gateway Center, Inc., Medical Staff, Victim Advocates and Prosecutors.

The following protocol has been developed in cooperation with Office of the District Attorney, The Gateway Center, Inc., Sexual Assault Nurse Examiners (SANE) and their supervising physician, Crisp County Sheriff's Office, Cordele Police Office, Dooly County Sheriff's Office, Vienna Police Department, Crisp Regional Hospital, Dorminy Medical Center, Ben Hill County Sheriff's Office, Fitzgerald Police Department, Rochelle Police Department, Abbeville Police Department, Wilcox County Sheriff's Office, Ben Hill County 911, Crisp County 911, Dodge-Wilcox 911, and Middle Flint Regional 911. The SART consists of one or more representatives of the aforementioned agencies.

Purpose of Protocol

The protocol is intended to:

- Facilitate the provision of consistent, comprehensive, sensitive, and non-judgmental treatment of victims of sexual assault as they progress through the medical, law enforcement, advocacy, and legal system;
- Standardize the collection of evidence in order to aid in the prosecution of cases; and, • Develop a coordinated effort among health providers, law enforcement personnel, prosecutors, and victim advocates ensuring that victims receive efficient and comprehensive medical care, evidentiary examination, emotional support, and referral information.

Use of Protocol

Sexual Assault Nurse Examiners, all branches of law Enforcement, including Prosecution, Crisp Regional Hospital, Dorminy Medical Center, The Gateway Center, Inc., victim advocates, and 911 call centers will use the protocol.

Monitoring the Protocol

Members of the Sexual Assault Response Team shall meet quarterly at The Gateway Center, Inc., or other designated place to review the previous quarter's sexual assault investigations relative to the implementation and utility of the sexual assault protocol. Any team member involved in the investigation shall be invited to attend. The team shall then evaluate the effectiveness of the protocol and recommend measures to improve compliance; therefore, the attendance of all members is required regardless of the counties' involvement in the cases to be reviewed.

In order to preserve the confidentiality of the victim, investigations of sexual assault victims who decline the services of the advocate or other support services governed by this protocol will not be discussed. Details of the criminal investigation of any sexual assault will not ordinarily be discussed.

DEFINITION OF SEXUAL ASSAULT

Sexual Assault does not discriminate among race, sex, socio-economic class or age. Persons may be sexually assaulted by strangers, acquaintances, or members of their family.

Sexual assault is defined as sexual contact or intimacy initiated by one or more persons against another without their consent. This includes instances when victims are unable to give consent due to age or mental or physical incapacity.

In Georgia, there is no one law applicable to the crime of sexual assault. Rather, there are a number of laws that apply (e.g., rape, sodomy and aggravated sodomy, statutory rape, sexual battery, aggravated sexual battery, child molestation, aggravated child molestation).

PROCESS OF CASE MANAGEMENT

A. Sensitivity to the Needs of Victims

Ensuring that sexual assault victims will be treated with sensitivity and compassion requires that victim services, law enforcement, medical, and prosecutorial personnel be aware of the special needs of these victims.

Victims of sexual assault, like victims of other violent crimes, not only must cope with the physical trauma perpetrated against them, but they must also deal with the emotional and psychological repercussions of the assault. However, because sexual assault, unlike other crimes, is such a complete and violent violation of the most intimate parts of a person's self, the emotional and psychological repercussions of a sexual assault can be devastating. The humiliation and degradation victims may feel often are compounded by feelings of guilt, because society continues to perpetuate the myth that sexual assault victims somehow are responsible for the crime committed against them. For this reason, victims of sexual assault often are reluctant to report the crime and, therefore, must receive immediate support from agency personnel if they choose to report.

While victims of sexual assault may feel guilty, frightened, ashamed, dirty, angry, anxious, embarrassed, or any number of other emotions, it is important to remember that there is no "typical" way for victims to feel, react, or look after a sexual assault. Some victims may appear to be calm while others may look visibly upset or enraged.

Victim confidentiality should be strictly protected. Professional staff should make direct inquiries of the victim regarding how to address the disclosure of confidential information. Assumptions should not be made concerning whether it is appropriate to disclose

information to family, friends, or employer, about the assault or the victim's sexual preference.

A desired part of the recovery process for the individual is that others begin to view the individual as a survivor rather than a victim. Throughout the protocol, the term "victim" is used to denote a person who has been recently assaulted. "Survivor" is used to describe a person who has begun the recovery process. A goal of affected agencies should be to assist a victim to become a survivor. Giving the victim control over decisions, where deemed appropriate, is an important part of the transition from victim to survivor.

B. First Report

The victim usually makes the first report of a sexual assault to a dispatch or communications center. Dispatch or communications staffers are critical in aiding the victim to regain control and composure after an assault.

If the victim is the caller the dispatcher should:

- Obtain the victim's name and location immediately.
- Determine if the victim is currently safe and whether or not the victim needs immediate medical attention.
- Dispatch the appropriate law enforcement units, and, if necessary, emergency medical help.
- Assure the victim that help is coming, and instruct the victim not to eat or drink, bathe, urinate, douche.
- Ask victim if they are still wearing the same clothing they were wearing during the assault. If they are, tell the victim not to change and come as they are. If they are not wearing the same clothing, instruct the victim to leave the clothing as is. Advise the victim not to move or touch anything and not to disturb items used as weapons.

Once law enforcement determines that a Victim Witness Assistance Program (VWAP) advocate and/or a SANE will be needed, law enforcement will inform the dispatcher to notify the Gateway Center, Inc.

C. HBI 297 (effective May 28, 2008) allows GA to be in compliance with the VAWA reauthorization of 2005 that requires all states to prove in policy and practice that all victims (18 and older) have access to a forensic exam regardless of whether or not they choose to speak with law enforcement or further the case.

D. Special Circumstances

1. Crisp, Dooly, and Wilcox Counties

- a. If the victim, 18 years of age or older, calls 911 dispatch requesting a Sexual Assault Kit, but doesn't want to make a report to law enforcement, dispatch is to contact the investigating law enforcement agency. Law enforcement will

contact the VWAP advocate. The Sexual Assault Kit will be administered by the SANE at The Gateway Center or Crisp Regional Hospital. Evidence will be collected and labeled with the victim's information by the SANE and turned over to the responding law enforcement officer.

- b. If the victim, 18 years of age or older, comes to the hospital wanting a Sexual Assault Kit, but doesn't want to make a report to law enforcement, the hospital is to contact the investigating law enforcement agency. Law enforcement will contact the Gateway Center advocate. Evidence will be collected and labeled with the victim's information by the SANE and turned over to the responding law enforcement officer.
- c. The responding law enforcement agency will be responsible for storing evidence collected from the forensic exam to include but not limited biological materials such as stains, fluids, or hair samples, for not less than 12 months from the date any such evidence is collected.
- d. The Criminal Justice Coordinating Council (CJCC) of Georgia will be responsible for paying for all costs associated with the forensic exam. The Gateway Inc. will be responsible for submitting the request for payment to the Georgia Crime Victims Compensation Program; otherwise, the medical facility or personnel from the Victim Witness Assistance Program will submit the request.

2. Ben Hill County

- a. If the victim, 18 years of age or older, calls 911 dispatch requesting a Sexual Assault Kit, but doesn't want to make a report to law enforcement, dispatch is to contact the investigating law enforcement agency. Law enforcement will contact the Gateway Center advocate. The Sexual Assault Kit will be administered by the Gateway Center Inc. or by a SANE at Dorminy Medical Center. Evidence will be collected and labeled with the victim's information by the SANE and turned over to the responding law enforcement officer.
- b. If the victim, 18 years of age or older, comes to the Dorminy Medical Center wanting a Sexual Assault Kit, but doesn't want to make a report to Law Enforcement, the hospital is to contact the investigating law enforcement agency. Law enforcement will contact the Gateway Center advocate. The Sexual Assault Kit will be administered by the Gateway Center Inc. or the emergency department medical personnel at Dorminy Medical Center. Evidence will be collected and labeled with the victim's information by the medical personnel and turned over to the responding Law Enforcement Officer.
- e. The responding law enforcement agency will be responsible for storing evidence collected from the forensic exam to include but not limited biological materials such as stains, fluids, or hair samples, for not less than 12 months from the date any such evidence is collected.

- f. The Criminal Justice Coordinating Council (CJCC) of Georgia will be responsible for paying for all costs associated with the forensic exam. The Gateway SAC will submit the request.

E. Notification of Sexual Assault Response Team

1. Crisp, Dooly, and Wilcox Counties

a. If the victim is at the medical facility:

- The nursing staff should contact Dispatch or law enforcement.
- The E.D. physician or physician extender will provide a medical screening examination.
 - If no treatment is indicated in the Emergency Department (ED) and a SANE is on-call, then the patient (if 17 years of age or younger) will be escorted to The Gateway Center, Inc. by the relevant law enforcement agency for examination and evidence collection if within the 120-hour time frame. If requiring the victim to travel to The Gateway Center, Inc. would cause further trauma or undue stress to the victim, it will be the priority of the SANE and Gateway Center advocate to meet the victim at the ED if possible. Equipment used at Gateway for medical exams can be transported to the ED.
- If the patient has obvious injuries or requires medical treatment in the Emergency Department, the law enforcement will contact the VWAP advocate, CAC advocate, who will contact the SANE. The examination will be performed at the hospital.
- If there is no SANE available, then the emergency department will proceed with the examination and evidence collection.

b. If the victim is at the scene:

- The incident is reported through 911 Center and forwarded to a law enforcement agency. Uniformed patrol is dispatched to the victim.
- Uniformed patrol advises the Supervisor of facts, and the determination is made to contact the on-call detective/investigator.
- Law enforcement will contact The Gateway Center, Inc. staff, unless there are visible physical injuries, then the victim should be transported to the nearest available medical facility capable of providing basic life support.

Law Enforcement Agency-Responses

A. The Role of Law Enforcement

Law enforcement officers and detectives play a crucial role in overcoming the psychological hurdles which confront a victim and then obtaining the victim's cooperation in the assault investigation. Since a victim's ability to cope with the crime and its aftermath may prove critical to the ultimate success of criminal prosecution, it is imperative that law enforcement agencies treat the victim of sexual assault with the

utmost compassion while skillfully guiding the victim's potentially uncomfortable journey through the criminal justice system.

Investigators must remain sensitive to the individuality of each victim and the massive impact a sexual assault may have upon the victim and the victim's family and friends. An investigator should take into account not only the particular assault suffered by each victim, but the victim's age, physical abilities and culture.

B. The Responding Law Enforcement Officer

The first law enforcement officer to reach a sexual assault victim is usually a uniformed officer. This officer, as with others who investigate the case, should quickly develop a positive rapport with the victim while initiating the gathering of evidence.

1. Immediate Response

- The responding officer should first address the victim's physical and medical needs. Emergency first aid should be offered, if necessary, while awaiting an emergency medical response unit.
- The responding officer should be calm, sympathetic and understanding. To increase the victim's emotional comfort and security prior to a transfer to a medical facility/The Gateway Center, Inc., the officer should explain to the victim, or the minor victim's guardian, the actions anticipated on the victim's behalf, including a physical examination.
- The officer should also ask the victim to refrain from washing, showering, brushing teeth, using a mouthwash, smoking, eating, chewing gum, breathe mints, hard candy, drinking, douching, urinating, or defecating to prevent the loss of valuable physical evidence. The evidentiary importance of preserving personal clothing and articles from the crime scene should be explained. Even if a victim had bathed or douched, the officer should nevertheless proceed to transport the victim to the appropriate medical facility.
- The responding officer should also ask the victim limited questions about the sexual assault. Not more than two officers should conduct questioning in the greatest privacy available, and questioning should be limited in scope to crucial information immediately needed by law enforcement.
- The crime scene will be processed per the investigating agency's operating policy.
- The responding law enforcement officer should proceed to the medical facility or The Gateway Center, Inc. and the officer should:
 - a. Remain at the medical facility/ The Gateway Center, Inc. until the investigating law enforcement officer(s) has arrived; and
 - b. Thoroughly brief the investigating law enforcement officer(s) on any information about the victim, the assault, the assailant, and the crime scene, which the officer has obtained. These briefings should take place in a private setting where other patients or hospital personal cannot overhear confidential information.

2. Delayed Reporting

Forensic evidence may remain for a general time period of up to 120 hours in the victim's body or there may be evidence of tearing or other internal abrasions. For this reason, the victim should be encouraged to seek medical care.

3. The Medical Examination and Law Enforcement

Law enforcement officers should not be present during the medical examination of sexual assault victim, unless there is a specific evidentiary or investigative necessity that requires their attendance. Any person, particularly a sexual assault victim, deserves a personal examination free of unnecessary, non-medical strangers.

4. The investigator's Role in Sexual Assault Cases

The primary investigator in a sexual assault case has a critical role in the successful prosecution of the case. The physical and emotional health of the victim must be considered at each stage of the investigation.

C. The Investigator's Response

1. An investigator will usually be summoned to the medical facility/ The Gateway Center, Inc., where the victim has been taken. The investigator should respond immediately to the facility.

The investigator should conduct a thorough interview with victims 18 yrs. and older and should document the facts of the investigation. If the victim is 17 years old or younger, the investigator will request that The Gateway Center, Inc. conduct a forensic interview.

During the initial contact, the investigator should:

- a. Clearly identify himself/herself to the victim/minor victim's caregiver
 - b. Verify the information obtained by the dispatcher and/or responding officer which may help the police locate the suspect;
 - c. Attempt to explain to the victim/minor victim's caregiver what is being done on the victim's behalf
 - d. Inform the victim/minor victim's caregiver that another interview may be conducted at a later time.
2. The minor victim's interview at The Gateway Center, Inc. will be video/audio recorded. Notice to the minor victim's caregiver shall be accomplished by intake paperwork stating such, printed in English or Spanish advising that the interview will be video/audio recorded and shared with MDT members.
 3. The investigator may consult with the VWAP advocate to explain the actions being taken by the police and to seek their cooperation and assistance in future contacts with the victim.

4. Transportation arrangements by law enforcement will be made to a safe location for the victim.
5. The investigative personnel should verify that the chain of custody on the evidence obtained at the medical facility/The Gateway Center, Inc. is correctly inventoried and prepared for transfer to the crime lab if appropriate. Investigators should confirm with evidence custodian that the evidence is transferred to the lab in a timely manner.
6. **Victim Follow Up**
The primary law enforcement officer will keep in touch with the victim as needed and as is applicable for the investigation process. The primary law enforcement officer should refer the victim to the Victim Witness Assistance Program advocates as determined necessary by the investigator.
7. **The Case Report**
The primary investigation officer in a sexual assault case has the crucial responsibility of compiling all the information learned through the investigation. The case report will be the main source of information for the prosecutors handling the case. Therefore, it is imperative that every effort is made to be as thorough, accurate and informative as possible in building the report.

Victim Advocate Response

A. Initial Response

1. **Victim Witness Assistance Program Advocate**
Victim advocates should be concerned for the safety and well-being of the victim. The role of the victim service provider is to:
 - With the consent of the victim, help identify and address the immediate concerns of the victim (e.g., are they in a safe place, are there family and friends whom the victim wishes to be contacted, are medical care or transportation to the hospital needed, is clothing needed to wear home from the hospital);
 - Provide information to victims regarding the effects of destroying evidence, taking a bath, washing clothes;
 - Provide emotional support and crisis intervention to victims and their non-offending family members; and

For their own safety, and to avoid interfering with the investigation, victim advocates do not go to the crime scene. Victim advocates are not investigators or attorneys and do not investigate cases or give legal advice. The role of the victim advocate should be explained to the victim. The advocate should determine whether the victim wishes to receive victim services.

Because sexual offenders may be predatory and/or serial offenders, any notification of a sexual assault to the advocate should be reported to the appropriate law enforcement agency. While the victim may decide not to pursue a criminal complaint of the incident, it may be important to other ongoing investigations that law enforcement be made aware of the assault.

2. The Gateway Center, Inc. Advocate

Although several different agencies come in contact with the victims at various stages after the assault is reported, The Gateway Center, Inc. is the coordinating agency for victims, providing emotional support through counseling and crisis intervention to victims and their non-offending family members. The Gateway Center, Inc. advocate will be present during medical exam (at the request of the SANE and/or victim);

B. Basic Services

Advocates need to achieve an effective balance between advocating for victims and working within the parameters of the criminal justice system.

1. Basic services provided by The Gateway Center, Inc. to victims may include:
 - On-site examination room for use by Sexual Assault Nurse Examiners for collection of evidence;
 - Video interviewing facilities for interviewing the victim;
 - Survivors will be referred to a counseling service.
 - Survivors will be offered the choice to participate in support groups provided free of charge by The Gateway Center, Inc.
 - Information and referral to community resources; and
 - Staff or volunteers will interact with agencies, and individuals on behalf of sexual assault survivors in order to achieve a particular goal or results.

2. Basic services provided by the Gateway Center advocate to victims, their families and friends may include:
 - Accompanying a victim to a medical facility and providing support throughout the medical examination;
 - Provide clothing and hygiene items;
 - If a survivor wishes the assistance, an advocate will accompany the survivor for any follow-up medical visits;
 - Throughout and after the medical visit, advocates help survivors deal with symptoms of anxiety, fear, depression, loss of control, and decreased assertiveness;
 - Advocate may accompany victim during initial police contact at medical facility;
 - Survivors will be referred to a counseling service.
 - Information and referral to community resources; and
 - Staff or volunteers will interact with agencies and individuals on behalf of sexual assault survivors in order to achieve a particular goal or results.

Advocates need the cooperation of many other agencies to provide information and support; thus, networking and maintaining effective lines of communication with law enforcement, medical, prosecutorial, criminal justice, and other social service organizations are essential.

In addition, VWAP advocates and The Gateway Center, Inc. staff and volunteers are available to speak to community groups about the issue of sexual assault and the services of the program. Staff may also provide training to law enforcement, medical personnel, prosecutors, and other agencies working with survivors. This training covers the nature and causes of sexual assault, the emotional trauma experienced by victims, and how to provide quality services to victims.

Prosecution Response

A crime is a violation of an act prohibited by statute. A felony crime is a prohibited act, that carries possible punishment of one year or more in the State Penitentiary. Under Georgia law, all felonies are in the jurisdiction of the Superior Court and are prosecuted by the District Attorney's Office for the Circuit in which the crime was committed. The District Attorney's Office for the Cordele Judicial Circuit prosecutes cases in the four counties of Ben Hill, Crisp, Dooly, and Wilcox.

Most crime victims regard a criminal case as their case and expect the prosecutor to pursue the case according to their wishes. Victims of sexual assault, which can include some of the most violent and traumatic cases handled by prosecutors, are no exception to this general rule. This sometimes results in conflict between the victim and prosecutor as to the appropriate resolution of the criminal case. While the victim is primarily concerned only with their individual case and feelings regarding the case, the prosecutor has taken an oath to uphold the Constitution and laws of the United States and the State of Georgia. The prosecutor represents the interests of the people of the State of Georgia (i.e., society as a whole) not merely the interests of the individual victim.

It is the ultimate legal responsibility of the prosecutor to determine the disposition of any case, including sexual assault crimes. It is the policy of the District Attorney's Office of the Cordele Judicial Circuit to make such a determination after careful consideration of the feelings and position of the victim, victim's family members and the law enforcement investigator who has had primary responsibility for the investigation. While the majority of cases prosecuted by the District's Attorney's Office for the Cordele Judicial Circuit are resolved with the agreement of the victim, such cannot always be the case. In any event, it is the policy of the District Attorney's Office to explain the reasons for the disposition of cases to victims. This is especially important when the disposition is contrary to the victim's wishes. If, after hearing the reasons, a victim is not in agreement with the disposition of the criminal case, he or she always has the option of filing a civil suit against the perpetrator in which the victim will be a named party and can direct his or her private attorney as to how to proceed in that action.

Victim's Rights

A. Crime Victims' Bill of Rights OCGA 17-17-1

The bill was passed during the 1995 legislative session. In addition to increasing the amount of money applied toward a victim's medical expenses from the Victims' Compensation Fund to \$15,000, it also requires victims be, wherever practicable, notified of the arrest of the accused, release of the accused from custody, court proceedings, hearings, arraignment, trial, sentencing, and release or escape of the perpetrator.

B. The District Attorney's Office of the Cordele Judicial Circuit

In 1995, the Georgia Legislature, at the urging of victim's groups and prosecutors, adopted the Crime Victims' Bill of Rights. The District Attorney's Office of the Cordele Judicial Circuit has continuously, since that time, paid the cost of printing and providing to local law enforcement agencies for distribution, an outline of those rights. (Exhibit 1) Victim's Rights were further expanded by the Georgia legislature in 2010 wherein additional duties were placed upon the District Attorney's Office.

The first requirement for a victim to exercise his or her rights is to be made aware of those rights. The above-referenced form is given to the victim by the responding officer and includes the phone number of the District Attorney for further information. If a member of the District Attorney's Office is not called on the scene, an attempt to contact the victim of a sexual assault within 24 to 48 hours through daily examination of incident reports retrieved from the investigating law enforcement agencies.

Upon initial contact, one of the District Attorney's Victim Advocates attempts to coordinate an immediate face-to-face interview and advises the victim of his or her rights under O.C.G.A. 17-7-1, et. seq. If, for any reason, the responding officer did not provide the victim rights form (Exhibit 1) to the victim, the District Attorney's Victim Advocate provides that form, as well as a copy of a brochure explaining the criminal process in simple terms (Exhibit 2).

The District Attorney's Victim Advocate also explains the availability of victim compensation and is available to assist in completing the form, as well as contacting the Governor's Criminal Justice Coordinating Council division of Victim Compensation if needed. The District Attorney's Office files appeals of adverse decisions on Victim Compensation if the office believes that the denial was made in error. At the initial meeting, as well as subsequent meetings, the District Attorney's Victim Advocate makes reference to support services appropriate to the needs of the victim.

Whenever possible, the District Attorney's Office notifies the victim of any proceeding in which the release of the accused will be considered and offers the victim the opportunity to express his or her opinion on the release of the accused pending judicial disposition. If any accused is

released on a pre-trial bond, a bond after conviction, or given a probated sentence, the District Attorney's Office requests of the Court to make "no contact with the victim, directly or indirectly," a condition of the release. The District Attorney's Office further notifies the victim of his or her right to notify the office if the accused violates the condition of release or if anyone else subjects them to threats or intimidation. Upon a victim's written complaint of such and/or other evidence produced, the District Attorney's Office can take action to petition the Court to revoke bond or probation and/or bring criminal charges against such individual.

During any hearing or trial, the District Attorney's Victim Advocate makes all reasonable attempts, consistent with Court facilities, to ensure that the victim waits in an area separate from the accused, his friends, and family.

Prior to disposition of the accuser's case, the prosecutor offers the victim the opportunity to express the victim's opinion on the disposition of the case, including plea or sentence negotiations and participation in pre-trial or post-trial diversion programs. The opportunity is given for both oral opinion and also in the form of a written Victim Impact Statement from the victim (Exhibit 3).

The District Attorney's Office notifies the victim of all hearing/court dates/post-adjudication proceedings, which can affect the custodial status or disposition of the case. This is accomplished by both telephone contact and with written notice when possible. Victims are also notified of appellate/parole decisions, and where possible, the prosecutor assists the victim in communicating with both the Department of Corrections (prison system) and Parole Board. The prosecutor's office also assists the victim with enrolling in the 24-hour automated notification system operated by the Department of Corrections to notify the victim of any escapes from custody by the perpetrator.

General Procedures

After a suspect is arrested, the Magistrate Judge sends a copy of the warrant to the District Attorney. Cases are usually assigned to a specific prosecutor when the warrant is received. The District Attorney's Office for the Cordele Judicial Circuit primarily utilizes a vertical prosecution case-assignment system, so that the prosecutor initially assigned the case will follow it through until its conclusion in the office. However, various factors including Assistant District Attorney turnover, legal/personal conflicts, complexity of the case, etc. may occasionally cause a change or addition to the prosecutor initially assigned the case. The latter situation is the exception, but it does occasionally happen. The ultimate assignment of prosecutors to a case is the responsibility of the elected District Attorney who has that legal obligation as part of his official duties.

In every case which appears to be able to be resolved only by trial, as opposed to some other disposition, the prosecutor and advocates make all reasonable efforts to visit the courtroom with the victim when there is no court action taking place in order to acclimate the victim to

the courtroom and explain trial procedures in an attempt to raise the comfort level for the victim under admittedly unpleasant circumstances.

Each sexual assault victim is provided the name and phone number of the prosecutor and victim advocates assigned to his or her case, and the staff of the District Attorney's Office is always available to advise and consult with victims, for the date of the incident, to literally decades later when parole issues arise.

The Georgia Code requires that there must be consent to any and all medical procedures (OCGA 31-9-2). Under OCGA 31-9-7, the legal age of consent for medical treatment is 18. However, there are exceptions. For tests and treatment connected with pregnancy, a female can consent regardless of her age or marital status. Under OCGA 31-17-7, any minor can consent without either parent's permission to those medical services, which deal with the treatment of a sexually transmitted disease. Emergency case can be rendered under implied consent.

Financial Resources

There are a number of costs associated with a sexual assault, in particular the costs of collecting evidence; hospital or health provider fees including fees for the physical examination; lab expenses including the collection of specimens, tests for pregnancy and tests to detect the presence of HIV antibodies; medications to prevent sexually transmitted diseases; follow-up; and treatment for any injuries. In addition, there may be costs to the victim of lost wages, and for a family, funeral expenses.

A. Payments for Forensic Exams

In 2011, HB 503 enacted a mandate requiring the Criminal Justice Coordinating Council (CJCC) of Georgia to pay costs of collecting evidence in rape and aggravated sodomy cases, OCGA 16-6-1 and OCGA 16-6-2.

B. CJCC- Georgia Crime Victims Compensation Fund

1. The Gateway Center, Inc.

For victims who have received services from a The Gateway Center, Inc. SANE, medical costs associated with the assault (e.g., pregnancy test, test for HIV) will be filed by The Gateway Center, Inc. if applicable. If application is made and approved, payment will be made directly to The Gateway Center, Inc. and dispersed to the SANE and the appropriate lab. The victim will not be charged for any services received at Gateway.

2. Victim Witness Assistance Program

Medical costs associated with the assault such as the pregnancy test, test for HIV, emergency contraception, and treatment for any injuries, reimbursement can be claimed through the Victim's Compensation Fund, and if application is made and

approved payment will be made directly to the hospital or other medical provider, including a Sexual Assault Nurse Examiner. However, if a victim is insured or on Medicaid, then those sources could be sought before the Victims' Compensation Fund is used. If the victim has to pay any part of the bill, then those costs can be claimed from the Victims' Compensation Fund.

3. Payment Procedures for The Gateway Center, Inc. or Other Medical Providers

After completion of a forensic exam, The Gateway Center, Inc. staff or medical facility staff conducting the forensic exam will complete all required documents and payment forms as provided by the Criminal Justice Coordinating Council (CJCC) of Georgia. The required forms and documents will be submitted by The Gateway Center, Inc. or medical facility to the Georgia Crime Victims Compensation Program for reimbursement.

Sexual Assault Nurse Examiner

A. SANE Selection/Supervision

Selection of Sexual Assault Nurse Examiners (SANE) shall be based on qualifications, training, and experience of potential applicants in both the medical field and in the field of forensic evidence collection.

B. SANE Response

The sensitive treatment of sexual assault victims and the careful collection of the forensic evidence related to their assault will require much of healthcare providers. But this same sensitivity and carefulness will also aid the transition of the patient from victim to survivor and the prosecution of the perpetrators of such crimes.

In order to preserve the patient's dignity and confidentiality, it is important to discuss these matters in a private office or secluded space with a rape victim advocate or other person present to support the patient. After informing the patient concerning what is to follow, additional consents are obtained, a secondary assessment is performed, and the history of the patient and the assault are taken. Note that while it is important to document the history of the patient and the assault as completely as possible, the examiner should not inquire about or document irrelevant aspects of the patient's sexual history. After completing the documentation for this phase, a serum or urine pregnancy test is ordered on women with childbearing capabilities. The SANE shall perform a complete forensic examination and upon completion, provide the patient with the proper precautionary medications to help guard against certain sexually transmitted diseases and emergency contraception medication. These medications are prescribed by the physician supervising the SANE nurses.

C. Law Enforcement Collection of Forensic Evidence

Any forensic evidence collected within 120 hours of the assault should be documented in the Georgia Bureau of Investigation/Division of Forensic Sciences Sexual Assault

Evidence Collection Kit (GBI/DOFS). The findings of the exam should be documented completely, noting injuries on the relevant anatomical diagrams. After the examination and evidence collection are completed, the examiner should check the labeling of all evidence and package it as instructed in the assault kit. Deliver the assault kit and (with the consent of the patient) a copy of the SANE exam and evidence collection document to law enforcement official. The official should sign for this material, establishing a "chain of evidence." Counseling and emotional support are continued.

Adequate and proper collection of specimen samples from the patient's body for forensic analysis is essential. The GBI/DOFS Sexual Assault Evidence Collection Kit is recommended for the evidence collection process. This kit is sufficient to collect samples from the patient's body to perform semen testing through DNA analysis. This kit is also sufficient for collection of blood and urine samples from the patient's body to determine if the sexual assault was drug facilitated. The instruction sheet provided in each kit should be followed explicitly for proper evidence and known hair collection. Inadequate collection and/or preservation of this evidence can eliminate the potential for suspect identification. Immediate air drying (no heat) of samples is critical for the optimum preservation of the evidence. All labeling or identifying information must be accurately completed. The label should include: the name of the patient, date and time of collection, sample source (or contents of clean paper bag when clothes are collected), and person collecting the sample.

The foregoing Cordele Judicial Circuit Sexual Assault Protocol is hereby adopted and remains in effect until such time as said protocol is amended and adopted.
